Actividad 1

OAuth 2

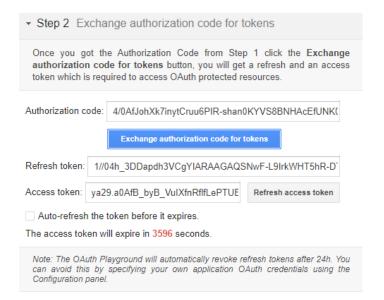

Step 1

Seleccionamos el servicio y pulsamos en Authorize.

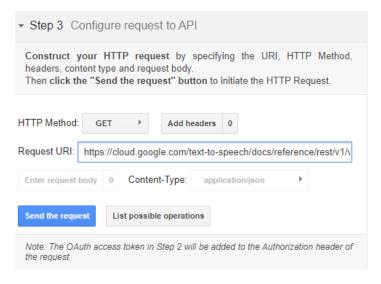

Step 2

A continuación ya podemos pulsar el botón "Exchange authorization code for tokens"

Step 3

Ahora para acceder al endpoint, itroducimos la URL en Request URI (https://cloud.google.com/text-to-speech/docs/reference/rest/v1/voices/list) y cuando pulsemos Send the request obtendremos la respuesta.

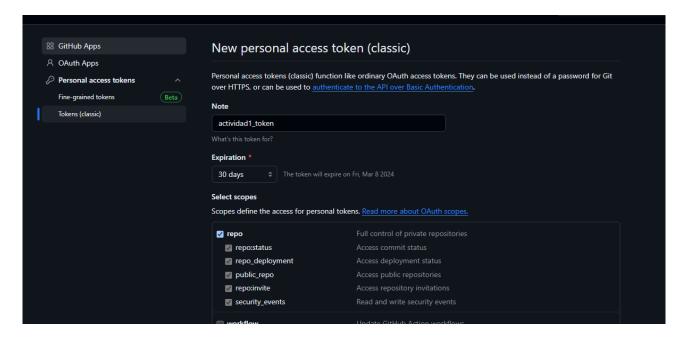

Respuest

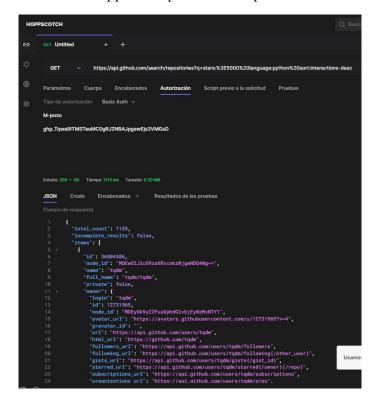

Request / Response

Github

Desde nuestra cuenta de github generamos nuestro token

He utilizado Hoppscotch para hacer la petición con el token en web para probar la practica.

Actividad 5

ModuloListViewSet

```
Django REST framework
                                                                          admin@example.com ▼
